

Melissa Antman is the Deputy Director of the Project Acceleration Transition Innovation Office (PATIO) at the Advanced Research Projects Agency for Health (ARPA-H). She is also the division director of ARPANET-H. Melissa is building capabilities in PATIO to provide resources and services to ensure that ARPA-H breakthroughs translate into solutions that lead to better health outcomes for everyone. She joined ARPA-H in November 2022 from the Immediate Office of the Director (IMOD) at NIH, where she also served on the ARPA-H planning team. Prior to the IMOD, she worked in the Center for Research Strategy at the National Cancer Institute, where she established and led the analysis team, and the Division of Extramural Research Activities and the Office of Science and Technology at the National Heart, Lung, and Blood Institute. She initially joined the NIH as Science and Technology Policy Fellow with the American Association for the Advancement of Science.

Prior to government service, Dr. Antman was an investigator in pharmaceuticals at Pharmacia & Upjohn/Pharmacia and at Bristol Myers Squibb, where she worked on programs spanning multiple therapeutic areas and stages of discovery and development.

Dr. Antman holds a Ph.D. in physical chemistry from the University of Wisconsin and an A.B. in chemistry from Dartmouth College.
