

Joshua C. Denny, M.D., M.S., F.A.C.M.I.

Chief Executive Officer
All of Us Research Program
National Institutes of Health

Josh Denny is the Chief Executive Officer of the National Institutes of Health's *All of Us* Research Program. *All of Us* seeks to enroll at least 1 million diverse participants to build an indispensable resource that accelerates precision medicine for all populations.

Josh has been involved since the program's inception. He was a member of the Advisory Committee to the NIH Director Precision Medicine Initiative Working Group, which developed the program's initial scientific blueprint. He then led the program's initial prototyping project and the *All of Us* Data and Research Center. Josh was named CEO of *All of Us* in January 2020. Prior to joining NIH, Josh was a professor of biomedical informatics and medicine, founding director of the Center for Precision Medicine, vice president for personalized medicine at Vanderbilt University Medical Center, and a practicing physician. There, he led discovery and implementation projects in precision medicine, including clinical pharmacogenomics and Vanderbilt's DNA biobank. He was a pioneer in the use of electronic health records for genomics studies, including the initial descriptions of phenome-wide association studies (PheWAS) and phenotype risk scores.

In addition to his leadership role with *All of Us*, Josh oversees the Precision Health Informatics Section at the National Human Genome Research Institute. There he and his team leverage large-scale biobanks to discover gene-disease relationships by using electronic health records to illuminate shared genetic architecture across diseases. At Vanderbilt, Josh was a PI for nodes in the Electronic Medical Records and Genomics (eMERGE) Network, the Pharmacogenomics Global Research Network (PGRN), and the Implementing Genomics in Practice (IGNITE) Network. Josh is a recognized expert in genomics, informatics, and precision medicine and is an author of more than 350 peer-reviewed publications. He is an elected member of the National Academy of Medicine, the American Society for Clinical Investigation, and the American College of Medical Informatics. Follow Josh on Twitter at @AllofUsCEO.
