

Dr. Savannah Sims is the Senior Manager for Global Health R&D Advocacy at Research!America, where she works to bridge the gap between science, policy, and advocacy. She engages with congressional offices to advance funding for research agencies like NIH, FDA, and CDC, tracks legislative developments in science policy and global health, and leads cross-sector collaborations to drive multi-sector investment in medical research. Savannah also translates complex scientific and policy issues into accessible insights through briefings, reports, and advocacy materials. Before joining Research!America as the Dr. Leroy Hood Science Policy Fellow, Savannah was a Postdoctoral Research Associate at Washington University in St. Louis, where she studied immune responses in pediatric brain tumors. She earned her Ph.D. in Immunology and Microbial Pathogenesis from West Virginia University, focusing on neuroinflammation in stroke and Multiple Sclerosis, and holds a B.Sc. in Immunology and Medical Microbiology from WVU with a research background in vaccinology.
